

Metalwërks[®] Trellises enhance public gathering spaces, provide shade or add texture to facades or streetscapes. Metalwërks Trellises can be free standing structures or cantilevered assemblies located at ground, roof, or plaza levels of a building. Choose from a wide variety of shading elements to achieve specific performance or aesthetic requirements, including formed or extruded metal profiles, perforated metal, translucent panels, woven wire mesh, expanded metal, or bar grille.

FEATURES AND BENEFITS

- Visually complement or contrast with Metalwërks plate wall systems
- Unitized or knocked down depending on project logistics or installation preference
- Long life solid metal assemblies for ultimate durability, with damage-resistant finishes
- Exposed components manufactured from non-ferrous aluminum or stainless steel that will not rust (unlike galvanized steel or AESS-coated steel)
- 100% recyclable and manufactured from materials with high post-consumer/ industrial content which can contribute to LEED credit
- Virtually limitless palette of colors and finishes
- High performance Kynar[®] finishes are post applied for the highest quality of coverage and uniformity
- Available in no-VOC powder coated finishes. Non-toxic and non-combustible.
- Material & Workmanship: 1-year standard, with 2- or 5-year options
- Finish warranties up to 20 years (coated aluminum). Consult Metalwërks for limitations.

USES

- Free standing public assembly areas
- Lounge areas
- Pool areas
- Public amenity spaces
- Ground, roof, or plaza building levels

EXTRUDED OPTIONS: TUBULAR ALUMINUM

- Square standard sizes: 1" x 1" up to 4" x 4"
- Rectangular standard sizes: 1" x 2" up to 2" x 8" – custom sizes up to 12" deep
- Round sizes: 1"–6" diameter – increments of 1"
- Custom airfoil, trapezoid or tapered profiles
